Lalit Raman Mishra

Profile

AI & Machine Learning graduate with hands-on experience in machine learning, deep learning, MLOps, and data visualization. Proven ability to build end-to-end ML pipelines, including fraud detection, insurance response prediction, LLM from scratch,and multimodal search engines. Skilled in Python, TensorFlow, and production-ready ML deployment.I had a research paper categorised as Useful category by Global IME bank.

Education

- Bachelor of Computer Science – Tribhuvan University, Nepal | 2022–2026
- Current GPA/Percentage: 69%

Technical Skills

- Programming Languages: Python, C++,SQL
- Machine Learning & AI: Supervised Learning, Unsupervised Learning, Anomaly Detection,
- Meta-Learning, Feature Engineering, Model Evaluation,LLM,MLOPS,RAG
- Deep Learning: TensorFlow, Neural Networks, Pytorch
- MLOps & Deployment: FastAPI, End-to-End ML Pipelines, API Deployment, Kubernetes
- Data Analysis & Visualization: Matplotlib, Seaborn, Pandas, NumPy, EDA
- Libraries & Tools: Scikit-learn, Git/GitHub, Databases
- Currently learning skills: Agentic AI

Experience

- Worked as Junior AI/ML Engineer at NetCore remotely during final year of my Engineering (**https://netcoreint.com/**)
- AI ML fellowship at FuseMachine
- Freelancer at Upwork and worked in various projects.

Certifications

- Machine Learning Specialization – Andrew Ng (Coursera)(https://coursera.org/share/13679a35a94debd989d93797cff3e1ce)
- Computer Engineer by Tribuvan University.

Selected Projects

- Vehicle Insurance Response Prediction (MLOps project deployed using standard practice like CICD.
- Build Multiple chatbot with RAG using LLMOPS standard
- Multimodal Search Engine (Text + Image, Crawller, Ranker,Vector database)
- Banking Fraud Detection System (National level Hackathon and also have research paper)

- Keystroke Dynamics Authentication (Typing Behaviour analyzing Model)
- Stock price Predictions.(currently working with my team)

Achievements

• Global IME Hackathon 2025 – Research paper Categorised as Useful Category
• Completed Andrew Ng's Machine Learning Specialization and various other courses
• Rising Talent at Upwork
• Developed multiple production-ready ML and MLOp
• Worked remotely as Junior AI ML engineer at NetCore
